### 4 Group ideas

After brainstorming, we clustered our sticky notes into 3 main themes:

- Visualization Ideas** – focused on how to represent the heritage data using charts like tree maps, pie charts, and geo maps.
- Analysis Goals** – focused on insights such as endangered sites, most active regions, and trends over time.
- Dashboard Features** – ideas that improve user interaction such as filters, tooltips, and interactivity.

These groupings helped us prepare for the next step of idea prioritization.

## Step-3: Idea Prioritization

### 4 Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

**TIP** Participants can use their own sticky notes to place ideas on the grid. This helps them see the ideas they are most interested in.
